## Work experience

Nov 2021 - Present

### Full stack developer at Rodeapps

As a full stack developer, I am part of the entire development lifecycle of the Rapidonkey project. Working in an Agile environment with a team of up to five developers, I help ensure the delivery of high-quality results through comprehensive code reviews and close collaboration with the product and design teams.

### I work on the Backend to:

- Create and document RESTful API endpoints
- Implement, test and maintain microservices
- Build, migrate and interact with databases

**Tech stack:** Git, Spring Boot, Hibernate, Spring Data JPA, Java, MySQL, Flyway, Mockito, Cucumber, Postman, Gradle.

### As for the Frontend, some of my career highlights include:

- The development of an Angular library of custom UI components
- I successfully led the initiation and development of a fresh Angular 17 codebase
- Contributions to UI/UX design choices
- The implementation of a polling system and route reuse strategy in Angular
- Solo work on a React project. Mainly bug fixing but also adding new features and Hygraph integration

**Tech stack:** Git, Angular, React, Typescript, Javascript, CSS, HTML, MomentJS, Hygraph.

## Personal projects

- Atelierpasteldecor: (Nov. 2024) Yet another shot at solving the SEO mysteries. A website built using NextJS, featuring a mobile-first design, EmailJS, GSAP animations and deployed on Netlify.
- Scoalameadegermana: (Mar. 2024) Main frontend developer on a fresh new codebase in React. With SEO aspects in mind, mobile responsiveness and cross-browser compatibility was the main talk throughout the development process of this project.
- Detergentiprofesionali: (Feb. 2024) I used Angular to fix bugs, add new features and help implement a responsive design.
- Memo-app: (Aug. 2022) A React app to help me stay organized. I used Firestore as a backend for the authentication system, for the database and for deployment.

## Known frameworks

Angular	●	●	●	●	●
React	●	●	●	●	●
Spring Boot	●	●	●	●	●
NextJS	●	●	●	●	●

## Programming languages

Typescript	●	●	●	●	●
